DESTI-SMART can be considered a pilot project, as it intends to integrate both transport and tourism aspects into urban planning processes and examine these sectors' interrelation and effects in the participating destinations. Thus, we feel honoured to lead such an important project with such a strong partnership scheme, comprising of organisations and experts with great experience in the field of Transportation and Tourism.

Even though many innovative methodologies have been implemented in transport and tourism sectors and many countries have achieved great results so far, little effort have been put and progress made towards the merging of these methodologies into a holistic approach for transport and tourism planning.

Towards this direction, DESTI-SMART promotes the collaboration among different stakeholders in 9 European countries and enables sharing information on the four (4) key thematic of the project: **Intermodality, Accessibility, Electro – Mobility and Transit Systems, Cycling and Walking.**

We are certain that this collaboration will be significantly productive and through the exchange of know-how and learning from each other, all together will meet our individual objectives, as well as the main objective of our project.

Launch Conference in Thessaloniki, Greece

The Launch Conference of the DESTI-SMART project successfully took place on 27th-28th September 2018 in the Council chamber of the Thessaloniki City Hall.

The Launch Conference coincided with the events for the World Tourism Day (WTM), organised by the United Nations World Tourism Organisation (UNWTO), for which DESTI-SMART was registered as a parallel action of WTD 2018.

DESTI-SMART is closely related to the 'Smart Destinations' initiative of UNWTO. The WTM theme for 2018 was 'Tourism and the Digital Transformation' which is linked to DESTI-SMART in terms of promoting the digital agenda for sustainable tourism mobility innovations in European destinations.

During the two-days meeting, the project partners had the opportunity to present the regions they wish to focus on during the project, as well as current tourism development resources and mobility systems. They also referred to their expectations from the project's implementation as well as their main priorities towards the achievement of sustainability in tourist destinations.

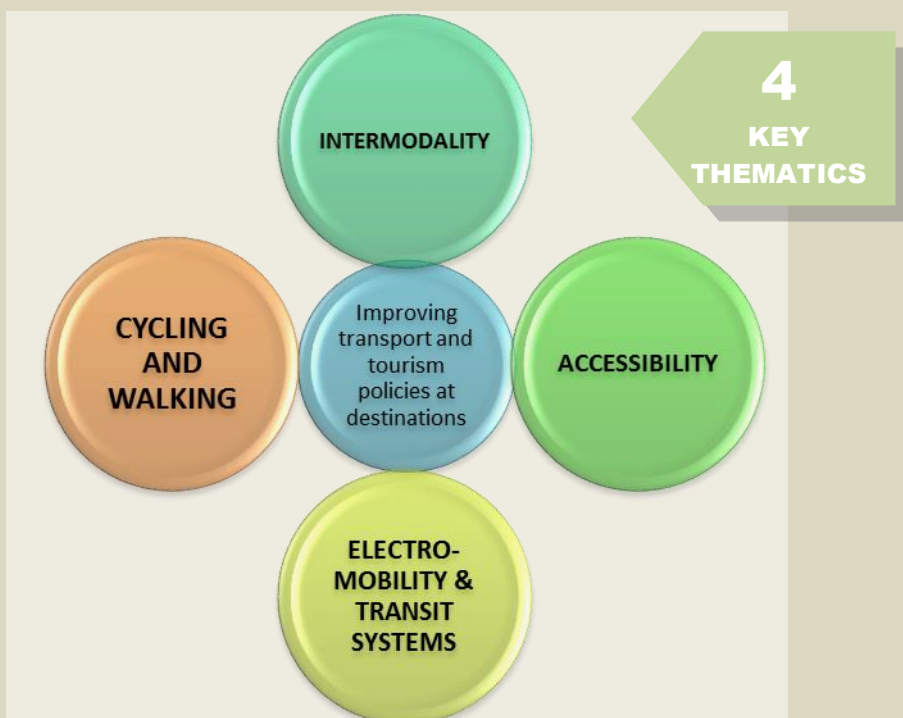

**METROPOLITAN
DEVELOPMENT
AGENCY
OF THESSALONIKI S.A.**

The Metropolitan Development Agency of Thessaloniki (MDAT) is an intermunicipal legal entity with 14 members, mostly Municipalities.

MDAT coordinates, designs and implements the "**Resilience Strategy of Thessaloniki**" in the context of the participation of the city in the 100Resilient Cities initiative pioneered by the Rockefeller Foundation for the development of urban resilience in the city of Thessaloniki.

MDAT carries out applied research on the pivotal problems of the local and regional government with an expertise in sustainable development, environment and infrastructure.

The overall objective of DESTI-SMART is the combined improvement of transport and tourism policies at tourist destinations. This could be achieved by integrating strategies for sustainable mobility, accessibility and responsible travel within the planning processes for sustainable tourism development and services. The transition to a low-carbon economy is a major challenge for all project partners, through sustainable multimodal mobility, along with innovations, efficiency, resilience, policy learning and capacity building for local authorities in tourist destinations.

First Stakeholder Groups meet in Pafos, Mallorca, Balaton, Thessaloniki, Hastings

Local and Regional Stakeholders met in 5 partner destinations during Semester 1

The first Stakeholder Group meetings of the partnership were held successfully during October and November 2018, in Pafos Cyprus, Mallorca Spain, Balaton Hungary, Thessaloniki Greece and Hastings United Kingdom.

Local and Regional policymakers as well as community and business stakeholders of the Transportation and Tourism sectors were involved in a learning process in which they were introduced to the project and its objectives. It was highlighted that their role is of great importance not only for the DESTI-SMART project implementation and for the achievement of the project's objectives, but also for their individual interests providing great opportunities for them. The four (4) key thematic of the project were discussed thoroughly and feedback from stakeholders was very positive and engaging, with actions to invite a wider number of stakeholders.

Stakeholders were invited to collaborate actively in the project and identify other stakeholders and actors of public and private interest which could contribute with their ideas and sources to the development of each partner's Action Plans in the framework of DESTI-SMART.

Thessaloniki GR 22 participants

Hastings UK 9 participants

Mallorca ES 7 participants

Lake Balaton HU 21 participants

Pafos CY 7 participants

DESTI-SMART at the World Travel Market in London

On November 6, 2018, DESTI-SMART project was represented in the World Travel Market Exhibition in London, at the stand of partner Pafos Regional Board of Tourism, Cyprus.

DESTI-SMART's presence in the World Travel Market 2018 Exhibition in London aimed to promote the issues that the project address, towards smart destinations:

- A. Investments in low-carbon transport systems for sustainable tourism mobility including e-Mobility
- B. Intermodality facilities for visitors inc. ICT, Apps and MaaS
- C. Accessible tourism for all, and
- D. Cycling and walking facilities for visitors.

NEXT EVENTS AND MEETINGS

Webinar on e-mobility "Supporting e-mobility in European regions and cities"	19 March 2019 (14:00-15:30 CET)
Dissemination Event of MDAT	20 March 2019 Thessaloniki Town Hall, GR
