

Dr. István Bóka & Dr. Tibor Navracsics
Presidents
Lake Balaton Development Council
Batthyány u. 1.
8600 Siófok, Hungary

2021.11.22.

Distinguished Sirs,

We are writing to ask you about the possibilities to arrange the 2nd Joint International Congress on cultural landscape management, regenerative and sustainable development with particular emphasis on water resources, shallow lakes and conservation of aquatic habitats in the Lake Balaton region, preferably in the town of Balatonfüred for a period of six days, sometimes between the 15th and the 30th of September 2022. The 1st International Joint Congress on “Sustainable Management of Cultural Landscapes in the context of the European Green Deal” took place in Santo Stefano di Camastra (Italy) from 9th to 13th September 2021. The objective of the congress was to shed new light on critical issues concerning the exploitation of ecosystem services, conservation of cultural heritage and to assess new perspectives to the future development of the cultural landscapes. The Congress was open to scientists, students, educators, managers, policy and decision-makers and consisted of invited lectures, scientific sessions with oral and poster presentations, and a scientific and cultural excursion. The Lake Balaton Development Coordination Agency has been our partner for many years, in several international projects (e. g. Ecocycles, SUMCULA) through which we established a very good and fruitful cooperation.

We hope that our proposal will be approved.

Yours Sincerely:

Carmelo Dazzi
President of ESSC

Tamas Kórmives
President of
EURECYS

Giuseppe Lo Papa
President of the
Organizing Committee

Sándor Némethy
President of the
Scientific Committee
